

REVIEWERS LETTER ACKNOWLEDGEMENT 2023

The review process of a scientific article is a time-consuming and dedicated task that greatly helps both the authors and the responsible editors fine tune and improve the final published article.

During 2023, a total of 43 reviewers were invited by our editorial committee, 31 of whom (72.09 %) eventually accepted the task of critically reviewing an article. Of the 21 articles received in 2023 for publication in *Revista Española de Podología*, all have been accepted and none have been rejected. The mean critical review time of the manuscripts was 9.3 days.

This note of appreciation is for all those who have selflessly contributed their time and effort as reviewers of the manuscripts submitted for publication in *Revista Española de Podología* during 2023.
